## TEXAS NURSING HOME PROFESSION

# Analysis of the 2014 <br> NF Medicaid Cost Report Database 

Prepared by the
Texas Health Care Association
PO Box 4554
Austin, TX 78765

# TEXAS MEDICAID COST REPORT ANALYSIS 

July 2016<br>Copyright © 2016 Texas Health Care Association

This analysis is based on the revenue and expense data reported on the 2014 Nursing Facility Medicaid cost reports. To correctly interpret this report, it must be noted that in the line item by line item analysis of costs, the data analyzed does not include costs that are considered by the Texas Medicaid Program to be unallowable. The cost report does include a line on which providers can report a lump sum amount of these unallowable costs (Line Item \# 407), however, this line item is not audited.

Additional notes:
o Data in this report does not include the costs incurred or the revenues generated by purely private pay (non Medicaid-participating) facilities.
o Several ancillary expense items will not be fully reflected in this analysis because providers are instructed to directly de-allocate ancillary expenses from other payer types (Medicare, private pay, etc.) through a special schedule on the cost report. The line items affected by this de-allocation represent Medicaid costs only, divided by Medicaid patient days.
o With the implementation of the Medicare Prospective Payment System (PPS), reimbursement was "rolled into" the daily Medicare rate for many of the ancillary items that were previously billed separately. The fact that these ancillary costs are not allowed to be reported on the Medicaid cost report (above) but the reporting of reimbursement or revenue for these costs is required represents an additional reason as to why typical financial ratios will be skewed when using Medicaid cost report data.
o The database used to compile this report consists of 930 cost reports, which is much less than in prior years. This large number of "missing" reports is a result of the large number of NF CHOWS (ownership changes) due to Upper Payment Limit (UPL) program and the Minimum Payment Amount Program (MPAP). HHSC rules state that the cost reports for outgoing owners will not be used in the rate setting database and are therefore excused from submission. Although the new owners will be responsible for submitting a cost report beginning with the effective date of their contract, their cost reporting period is tied to their fiscal year end and in many cases a cost report will

The charts on page 3 reflect industry averages for patient revenues, patient days, and major cost centers, as reported on the 2014 cost reports. Subsequent pages list expense and revenue averages, by facility size, for most line items in the cost report.
